PROFILE

- 4 years of experience as a Full-Stack Engineer with a knack for frontend (React, React-Native)
- Led 3 projects from conception to completion.
- Significant contributor to 2 additional projects.
- Collaborative team player
- Happy to lead, happier to collaborate—great projects are built together.

EDUCATION

2018 - 2019

NEW JERSEY INSTITUTE OF TECHNOLOGY

- Master of Science
- Computer Science

2013 - 2017

BMS COLLEGE OF ENGINEERING

- Bachelor of Engineering
- Computer Science

WORK EXPERIENCE

■ TapHealth

FrontEnd Lead | Remote | Aug 2024 - Nov 2024

- Led the development of an AI-powered embeddable chatbot on hospitals websites, enabling automated health-related queries with AI Symptom Diagnosis and Doctor Appointment Scheduling.
- **Technologies Used:** React, Next.js, PostgreSQL, Prisma ORM, Coolify Servers

■ The Blockjet Technologies

Software Engineer | Remote | Jan 2023 - Oct 2023

- Led the development of ViPay, a crypto wallet application enabling users to create, receive, and send crypto assets while tracking real-time USD/INR prices, with a UI and functionality similar to Trust Wallet.
- **Technologies Used:** React Native, Ethers.js, Realm DB, Express.js, MongoDB, Mongoose ORM

SKILLS

Frontend

- React
- React-Native
- Tailwind, Animations

Backend

- Express.js
- Next.js
- Java-Springboot
- Firebase

Databases & ORM's

- RDMS - SQL, Postgresql
- NRDBMS- Mongo, Firebase
- Prisma, Hibernate
- Mongoose

Programming Languages

- Javascript
- Typescript
- Java
- Python

■ Backstage Social

Founder & CTO | May 2021 - Jan 2023

- Founded and developed Backstage Social, a cross-platform networking app with a swiping deck UI, connecting students and professionals within the same institution or workspace.
- Made the business Model. Pitched at several Networking Events.
- **Technologies Used:** React-Native, Firebase, Firebase Cloud Functions

■ Forewood Safety

Software Engineer | Nov 2020 - Apr 2021

- Developed a diverse set of features involving updating code and libraries associated with both frontend and backend tech stack for a React based CRM tool used by mining companies worldwide.
- **Technologies Used:** React, AWS Terraform, AWS Lambda (Python), RDBMS, DynamoDB

■ SeedStages

Software Engineer | June 2020 - Oct 2020

- Designed and developed job application tracking, allowing employers to manage and track applications with real-time status updates.
- Integrated Zoom SDK for scheduling interviews with time and date selection, and implemented Google Calendar API to send calendar RSVP invites for the scheduled interviews.
- Mentored four interns in React Native and Firebase, guiding them through project tasks and technical challenges.
- **Technologies Used:** React, React-Native, firebase

■ Who.What.Why

Senior Web Developer | Apr 2020 - Oct 2020

- Technical lead in designing and developing an intranet portal for a non-profit media organization to collaborate and share resources in one place.
- Code snippets to read and write data across g-suite tools like sheets and docs.
- **Technologies Used:** Javascript, HTML, G-suite, Google sites,
